

MÄGERLE MFP
BELLOW COVERS

Original bellow covers are accurately fitting, dimensionally stable and withstand the highest mechanical loads.

HOW IMPORTANT IS THE OPERATIONAL AVAILABILITY OF YOUR MACHINES TO YOU?

The bellow covers protect your machines against external influences, especially against the penetration of coolant into the hydrostatic guideways. This contamination can lead to considerable and costly damage to the hydrostatic system.

Maintenance and inspection of your bellows should therefore be carried out regularly:

- Cleaning of grinding swarf
- Checking the bellow cover guide rails
- Check for cracks and leaks
- Replace the bellow covers if necessary

Do not only react when you first find cracks or leaks in your bellow covers.

YOUR ADVANTAGES

- Extended service life of your machines
- Trouble-free operation of your machines

If you have any questions, please feel free to contact us at any time.
